

DIY Kombo Site Plan - DIY - NOTE: Ensure when printing you select 'Actual Size' or the scale on the grid below will be incorrect.

| | | | |
|----------------|--|-------------------------|--|
| Name: | | | |
| Address: | | | |
| Date Measured: | | Time frame for install: | |
| Tel: | | Grass preference: | |
| email: | | Lead from: | |

Instructions:

On the grid section on the second page draw in the area where you require the artificial grass noting all measurements in cm. Mark on the plan any drains, the type of existing edging/border or if a new edge is required (note for installation of the crusher dust, a solid border is required around the entire area where the grass is to be installed, usually timber sleepers are used). Note whether grass or dirt is to be removed. If the grass is to be installed over concrete, timber etc, note the condition of the hard surface (if level, any repairs needed prior to installing the grass etc). Take a few photos of the entire area and the access to the site (note the width on the plan - we need 80cm for equipment to be brought in, and if any steps or gates to be removed).

Please note that glass can radiate the heat onto the grass surface and damage the grass. If there is any glass around the area, note where it is on the plan.

*WARNING – reflected light and radiated heat from glass fences and windows can damage the grass and void your warranty.

| | |
|--|---------|
| Skip bin required? | Yes /No |
| Access to area > 80cm wide (machine access) | Yes/No |
| Location for delivery of crusher dust near area? | Yes/No |
| Glass fencing or windows to be considered? | Yes/No |
